I don't recall any data that we have depicting those locations, but I will begin some research now and report back with anything that I find that might be of help.

All Please see below.

John – Do you know of any data sources?

David – can you ask in the REOC? I will need you to make this map once we get the data.

Matt do we have a NM GIS Resources we can reach out to?

Patrick – Do you have any data from the tronox project or a GIS contact with the state. If not Do you think you can do some online research for us ASAP?

Subject: Gold King Spill -- Dams/spillways

Janine...

Ben suggested that I get in touch with you. I am leading the sediment sampling effort in Farmington and I would like to get a map of the dams and spillways on the Animas River in New Mexico. It would probably help to include such structures on the San Juan River as well, maybe for 50 miles or so downriver from the confluence with the Animas. If you have any questions, please contact me on my cell phone.

Thanks,

Tom
